

Tools to Support Your COVID-19 Research

Enzo and its Online Market Place Axxora Provide a Wide Range of COVID-19 Solutions

With the infection rate and mortality rate rising every day, this novel infection is currently a global health risk concerning us all. This virus, officially named COVID-19 by the World Health Organization, is transmittable from person to person and has continued to spread across the globe since its initial outbreak in January 2020. It is the seventh virus in the coronavirus family to affect humans, different from the MERS-CoV and SARS-CoV viruses. To aid the efforts of developing vaccines and neutralizing antibodies against it, we provide a high-quality portfolio of respiratory antibodies, antigens, and detection kits to help you accelerate your research and help combat this global concern.

COVID-19 Detection

- COVID-19 RT-qPCR Assay Solutions
- COVID-19 and Coronavirus-Related Proteins
- Products Related To ELISA Assay Development

COVID-19 Detection

COVID-19 Characterization

- Coronavirus Antibodies
- COVID-19 and Coronavirus Related Proteins
- Products Related to Coronavirus Biology

COVID-19 Characterization

COVID-19 Therapeutic Development

- COVID-19 and Coronavirus Related Proteins
- Coronavirus Antibodies
- Drug Discovery
- Small Molecules Therapeutics
- Antiviral Response
- Inflammation and Immune Response Monitoring
- MAPK Signaling Pathway Monitoring
- Scale up Production

COVID-19 Therapeutic Development
